

Ben Sparks

Construction Planning and Scheduling

Ben Sparks has an extensive background in project management consulting for construction, public affairs, and litigation analysis disciplines. He has provided expert assistance in construction scheduling, project controls and documentation, economic and forensic construction analysis, damage calculations, and information management for construction projects.

Ben Sparks' background as a consultant and expert with experience in the management of construction projects ranging from \$3 million to \$500+ million, heavy civil, infrastructure, airport construction, transit, and commercial.

Having worked on a plethora of projects throughout the country, he understands critical path management in project development and construction from the early conceptual design phases, through procurement and bidding, to successful execution of the project plan, closeout, and dispute resolution. His litigation support experience includes both cost and schedule impact analyses.

Ben Sparks' delay analyses and presentation excel in issue clarity and communication. For most of his career he has established overall project budgets, CPM schedules, claims and conflict resolution.

Continuing Education seminars/classes on Scheduling/AI integration

A sample of Ben Sparks' Scheduling and Project Management support assignments include:
